

SPEECH THERAPY

Improve your communication, memory, cognition and ability to swallow.

Dementia

Swallowing

Neurologic Disease

Voice

Parkinson's Disease

Stroke

Benefits of Speech Therapy

- Learn swallowing strategies and diet modifications for swallowing disorders
- Ensure safe medication management
- Learn strategies to maximize memory recall
- Improve vocal quality and cognition (i.e. attention, sequencing, problem solving)
- Improve ability to express needs and communication understanding
- Receive education for you and your caregivers
- Increase safety so you can return home and manage daily living

Treatment Plan

Your therapy goals will reflect your diagnosis, needs, and abilities. Based upon your abilities and progress, therapy services can be provided up to six days a week and up to three hours a day.
